Massive raid to get Ine Givar activist. Following stories that Ine Givar activist, Philip Ned, had not been killed in a recent PSG attack, but had in fact masterminded the East Point Station massacre, the PSG today retaliated. PSG armoured vehicles moved into the Mitchell community (north of Tanna) and began firing indiscriminately. Around 150 homes have been destroyed, power lines and other amenities were cut, and over 80 square kilometres of farmland have been burned. Construction of a new refugee camp for the survivors has been ordered.
